

Pets

IN YOUR HOME

Making it safe for when we visit

Don't forget if your pet is a dog

We will need you to secure your dog.

By secure we mean:

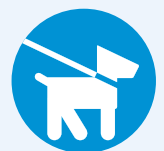

- put your dog in your car/truck and lock the doors. Make sure you wind the window down enough so your dog has fresh air
- put your dog on a leash and under the control of a responsible person. Not a young child.
- put your dog on a chain in a way that the chain cannot loosen or break. For example a fence post, a dog run or a tree trunk. Don't use door knobs, stakes in the ground or things that can be moved.
- put your dog in a room/garage/shed that you can lock and secure your dog with a lead to a piece of furniture that will not move. Remember to let your kids know so they do not unlock the door and take the dog off the lead.
- take your dog for a walk on a leash while our staff are at your home.

Why do I need to do this?

Some dogs can be very territorial and may not like it when our staff and contractors visit. Because of this our staff or contractors won't come onto the property or into your home if your dog is not secure.

We don't want this to happen as there might be important or urgent work we need to do at your home to keep it warm, dry and safe.

If you need more information on how to secure your dog please contact your local SPCA or have a chat your Tenancy Manager.
